

Corrosion-Resistant Slide Collection

Accuride presents a full range of corrosion-resistant slide choices for installations where exposure to moisture or high humidity is a key environmental factor. These four stainless steel products are a great solution for drawers or pull-out shelves in:

- Food service applications
- Wash-down areas
- Industrial storage of parts, equipment, tools, or supplies such as chemicals, paint, etc.,
- RVs, utility vehicles, or marine storage

Corrosion-Resistant Slide Collection

Model SS2028

With the narrowest side space of the group, this model provides an advantage in installations where space must be maximized.

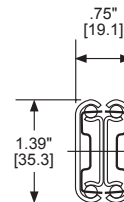

- 100-pound load rating*
- 3/4 extension
- .38" cross section width
- Hold-in detent
- Non-disconnect
- 12"–28" in 2" increments†

Model SS0330

Providing a load capacity on the lighter side of the heavy-duty category, this slide is for heavier drawers or pull-out shelves in applications that require full extension.

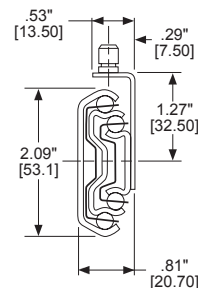

- 143-pound load rating*
- Full extension
- .75" cross section width
- Hold-in detent
- Non-disconnect
- 12"–24" (2" increments), plus 28"†

Model SS5322

The unique features on this model are over travel, for complete access to contents, and bracket mounting, which provides a disconnect method.

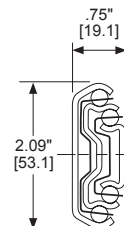

- 265-pound load rating*
- Full extension plus over travel
- .81" cross section width
- Hold-in detent
- 12"–24" (2" increments), 28" and 31"†
- Easy-mount brackets with locator pins to simplify disconnect. L-shaped brackets are placed over the pins and held in place by a snap ring on the front pin.

Model SS5321

The most heavy-duty performer of the group, this slide offers a slightly narrower profile, over travel, and the greatest load rating of the collection.

- 350-pound load rating*
- Full extension plus over travel
- .75" cross section width
- Hold-in detent
- Non-disconnect
- 12"–24" (2" increments), 28" and 31"†

Note: Check out Model CH3832 for applications that are indirectly exposed to humidity and require less corrosion resistance. This product is a regular steel slide with a special finish that provides 8 times more protection than a standard zinc finish.
