115RC

Linear Motion Track System

Model 115RC Linear Motion Track System is a unique movement solution comprised of lightweight aluminum tracks and re-circulating ball carriages that provide guidance, movement, and positioning for screens, panels, partitions, or other components in industrial, commercial, or institutional applications.

Features & Benefits

- **Aluminum track available in two lengths: 47" and 94"**
 - Corrosion-resistant track may be cut to the desired length.
 - Multiple lengths of track are butted together to extend the track to any distance required.
- **Multiple mounting methods:** The track may be side, flat, or vertically mounted.
 - When flat mounted, track may be oriented with the ball carriage facing up or down.
 - Vertical mounting is for non-load bearing applications.
- **Two re-circulating ball carriage options**
 - Stainless steel ball bearings: provides the greatest load capacity.
 - Polymer ball bearings: grease-free with smooth and quiet movement.
- **Multiple carriages may be inserted into tracks**
 - Carriages may be used separately to provide independent movement, combined as a unit, or both methods within one track.
- **Easy Installation:** Tracks have pre-drilled fixing holes and drilling marks for end stop holes.
 - End stops are attached after the carriages are inserted to contain carriages.
- **Load Capacity up to 265 lbs. [120kg]**
 - Load capacity is based on the type and number of carriages. Due to the extensive variety of applications and possible orientations for this product, please test this product in the intended application. This product is not recommended for high-torque applications.
