

Founded in 1962 as a small tool and die shop, Accuride International is the world's largest designer and manufacturer of sliding hardware. The company offers the broadest selection of movement solutions across markets and applications, as well as boundless innovation and unmatched dependability. Accuride produces light-duty, medium-duty and heavy-duty drawer and door slides for commercial and residential uses, and it is the leading producer of specialty slides.

OUR PILLARS

INNOVATION

Our engineers never stop innovating with over 100 patented designs. Those designs let you adapt movement into virtually any application.

SELECTION

We offer more than 100 models of slides, glides, and drawer runners – plus many lengths and variants, including telescopic, progressive, linear and friction slides. That selection means endless options for you and your project.

DEPENDABILITY

Every model of Accuride product undergoes thousands of cycles of testing. That rigorous standard ensures your projects withstand years of use.

CERTIFICATIONS

AFFILIATIONS

Accuride belongs to a number of industry associations to stay abreast of issues, trends and legislation within the marketplace.

AIA = The American Institute of Architects

AWFS = Association of Woodworking and Furniture Suppliers

AWI = Architectural Wood Institute

BHMA = Builder Hardware Manufacturers Association

CSI = Construction Specifications Institute

TESTIMONIALS

"Our customers look to us for unquestioned reliability and innovation in ball bearing slide technology for their projects – which is precisely why we're proud to partner with Accuride as our source for these products."

--Karen Armour, Product Manager, Häfele

"Accuride provides McKillican with the complete package of distribution support, including digital marketing, the widest offering of ball bearing slides and most important, a rock-solid commitment to quality. All this adds up to a product line that we can confidently offer to our customers as best-of-class."

--Calvin Luce, VP of Sales & Marketing, McKillican
